***Advisory Action***

Applicants' amendment after final rejection filed 1/10/2011 is acknowledged. The after final amendment is not entered for the following reasons:

1. Amendments to claims 13, 15, 21 will raise issues which require further consideration and search.
2. Amendments to claims 1 and 15 raises issues under 35 U.S.C. 112 second paragraph because claim 1 now recites that fermentation rate is reduced at 0-6C. It is not clear how fermentation can be done at any rate at 0C.
3. Amendment to claim 15 recites "the temperature of the blend during a part of the fermentation is 4 -8C. This raises issues under 35 U.S.C 112 second paragraph because it is not clear what is meant by "during a part of the fermentation". The word part does not appear to precisely define the cross section of time when the temperature is exactly at the recited values.

For the above reasons the amendment is not entered.
